

## Clin-IQ FAQs

1. **WHAT is Clin-IQ?** A scholarly research process in which faculty and learners collaborate to answer important clinical questions. For this brief (1,000 word) “mini-systematic review,” faculty and learners search for evidence-based answers from the current medical literature. Clin-IQs are publishable and have the potential to impact clinical practice.
2. **WHY consider Clin-IQ?**
  - Meets all ACGME scholarly activity requirements, and those of many other clinical disciplines.
  - Increases scholarly activities and productivity for faculty and trainees.
  - No IRB.
  - More publishable than a case report.
  - Creates a clinical learning community between disciplines and specialties, in academic and community settings across Oklahoma and beyond state borders.
  - Involves all members of learning community in translating clinical research into clinical practice to improve overall health.
3. **WHO participates in Clin-IQ?**
  - a. academic faculty,
  - b. community-based faculty,
  - c. trainees at all levels of clinical education,
  - d. practicing community clinicians of all disciplines and specialties, and
  - e. Medical librarians.
4. **HOW does Clin-IQ work?**
  - a. Identify a Clin-IQ Champion.
  - b. START SMALL.
  - c. Consult with medical reference librarian.
  - d. Begin with a relevant and important clinical question.
